EZPull Personal Trap Voice Release

Left LED
Voice release: blinks once a sec. - unit is waiting for a voice command.
Steady light when voice is detected.

Right LED
<u>Mute</u>: blinks once a sec.

Manual Target
Press & release to throws a bird. Left light will turn on steady for 1 Sec.

Voice Mute/Unmute
Press & release. If voice release is active, the right light flashes and the unit becomes muted.
If the unit is muted, the left light flashes and voice release becomes active.

Wobble Trap Control
Use only with a wobble receiver. When pressed, both lights are flashing. To continuously wobble, keep holding until both lights are off and release the key.
To stop the wobble and "inch" to desired direction, press and release as soon lights start flashing.

Power
To turn ON, press & release, both lights will turn on.
To turn OFF, press & hold, both lights will alternate. Release key only after both lights are off.

For Personal Trap model PTVR-W Ver. 13 or higher
